-  [www.milanlatinovic.com](http://www.milanlatinovic.com)
-  Skype milan.latinovic

Date of birth 1986-04-28

WORK EXPERIENCE

December 2017 – current

Senior PHP/Full-Stack Developer

TimeTac GmbH, Softwareentwickler, Graz, Österreich

TimeTac develops and distributes web-based and mobile time tracking systems to a variety of clients including Samsung, Wiener Wohnen, Port of Hamburg, Willhaben, Runtastic, etc. As a senior developer I'm in charge of designing, developing and deploying new modules for our software, database optimizations, high end SQL calculations and client communication related to integration of our software.

July 2016 – current

IT Consultant at Codeable (per project, not full time)

Codeable is a platform which connects web service owners with top-notch IT consultants (only 2% of developers that apply are accepted as members of the platform). After successfully passing multiple Codeable tests I begin my work as part time Consultant, mostly for PHP based services.

Link to my portfolio at Codeable (with user reviews): <https://codeable.io/developers/milan-latinovic/>

My roles include: **frontend development** (HTML, CSS, JavaScript, jQuery), **backend development** (mostly PHP/WordPress), **optimization** (server configuration, LAMP stack, caching, Nginx servers, migrations, staging environments), **security** (SSL, data integrity, penetration testing, code review) and **user behaviour analysis** (analytics, heatmaps, funnels, e-commerce stats, CTR, SEO), for **various clients** from UK, USA, Germany, Netherlands, Russia and Estonia.

Additionally, I was accepted as WPML consultant (WPML is large WordPress plugin for Multilanguage support) which is closely related to a work that I provide at Codeable:

<https://wpml.org/contractor/milan-latinovic-consultant-from-codeable-io/>

July 2011 – December 2017

Head of department for engineering and technical support

Agency for Information society of Republic of Srpska (AISRS)

As a Head of department for IT, my roles include: strategic planning and implementation of IT projects (product ownership, use cases, user stories, service architecture), but also a transition and process management, and agile team leadership (SCRUM or KANBAN). Since we are small team I also take a role of senior developer. We do our own provisioning (physical Windows Servers, Hyper-V virtualization, virtual machines Windows/Linux, LAMP stack) so some DevOps (automatic backups, custom scripting, APM) and security (network monitoring, AlienVault, hardening, etc.) is included as well. My most important role was **product owner and team leader of successful implementation of technical solution for AIDRSCA - Electronic signature of Republic of Srpska, where I was acting as a leader of 200,000 EURO worth of project, with 10+ team members and 1-year timeframe.**

June 2009 – July 2011

Software engineer

Agency for Information society of Republic of Srpska (AISRS)

As a Software engineer at AISRS, I was working on development on both internal and external services. Some of important projects: Electronic protocol, RegIKT, AIDRSCA, Open Government.

EDUCATION AND TRAINING

- 2014 – current *PHD of Computing and Automatics*  
University of Technical Sciences, University of Novi Sad, Serbia
- 2009 – 2012 *Master of Computing and Informatics*  
University of Banja Luka, Faculty of Electrical Engineering (FEE)
